Omkar Pardeshi

PROFILE

I am a collaborative and creative full-stack developer specializing in front-end technologies and backend development. With expertise in building scalable, efficient applications and a passion for clean code and seamless user experiences, I thrive in dynamic environments. I am dedicated to delivering innovative solutions that meet client expectations while excelling in performance and functionality.

PROFESSIONAL EXPERIENCE

Gephels System, Full Stack Developer ∂

2023 - present | Pune

- Collaborated with a team of developers to design and build three scalable products: Onsite Check-In Module, Event Admin, and Registration.
- Developed features like customizable user listing, flexible mail template creation and sending, real-time reporting, and interactive floor map design, enhancing functionality and user experience.
- Implemented robust backend services using **Node.js** and **Express.js**, with database integration in **MySQL** for efficient data management.
- Focused on building secure, high-performance, and scalable solutions while ensuring seamless collaboration between front-end and back-end systems.

Line-scripts Technology,

2023 - 2023 | Pune

Frontend Developer *⊘*

- Contributed to the development and enhancement of features for **Odoo**, focusing on creating responsive and user-friendly interfaces to improve client satisfaction.
- Designed and implemented dynamic UI components and interactive front-end elements, ensuring seamless user experiences.
- Prioritized clean, maintainable code and optimized front-end performance to meet client requirements and project deadlines.
- Worked in a team-oriented environment to deliver high-quality, scalable solutions that addressed complex business needs.

Ethosh Digital, XR Intern *⊘*

2021 - 2022 | Pune

- Gained hands-on experience in Augmented Reality (AR) and Virtual Reality (VR) technologies, working as an Extended Reality (XR) Developer.
- Collaborated with the development team on live projects, following the Agile methodology
 to ensure timely and efficient delivery.
- Utilized tools like **Blender** for 3D modeling and design, contributing to immersive AR/VR experiences for various applications.
- Developed skills in creating interactive and visually engaging XR environments while working closely with multidisciplinary teams.

SKILLS

Programming Languages: JavaScript (ES6), TypeScript, Python

Web Technologies: HTML5, CSS3, SASS, Bootstrap, Tailwind CSS

Libraries/Frameworks: React, Redux, Reactstrap, Node.js, Express.js, CMS

Databases/Tools: MySQL, Firebase, Appwrite, MongoDB

Version Control & Deployment: Git, Netlify, Vercel

EDUCATION

VIT, Instrumentation and control engineering

2019 - 2022 | Pune

GPN, *Polymer Technology* **72.38%**

2015 - 2018 | Nashik

PROJECTS

CodePersona, Full Stack Project ∂

- Developed a fully responsive and mobile-friendly portfolio using **React** and **Next.js**, designed to showcase projects and skills effectively.
- Implemented a dynamic blog section where users can create, store, and view their own blog entries (title, description, and image) with seamless integration of **Firebase** for storage and real-time data fetching.
- Added a quotes feature to display dynamically fetched quotes with author details, stored and managed in **Appwrite**.
- Integrated Git for version control, with automated deployment pipelines set up on Vercel
 and Netlify, ensuring smooth and continuous deployment.
- Designed a user-friendly and smooth UI/UX with plans to incorporate an **admin panel** for enhanced management and functionality in future updates.

MinimalFolio, Frontend Project ∂

- Designed a simple, responsive portfolio with sections for About, Projects, and Contact.
- Ensured mobile-first design principles and interactive functionality for an enhanced user experience.

COURSES

Git Version control. Youtube *⊘*

learning about Git in depth along with workflow so that you can use git in your daily life.
